## BEST PLUMBING SPECIALTIES

Your One Stop  
**GREEN  
SHOP**

**BEST has been providing quality plumbing and maintenance specialties and water conservation items and solutions for over 48 years!**

### FLUSH VALVES

Electronic or manual, we have all the latest water-conservation products including Dual-Flush flushometers that will save you anywhere from 30-70% in water usage! Save on sewer costs and maintenance with products from the top "green" manufacturers such as Delany, Sloan, Toto, and Zurn.

### PRESSURE ASSISTED TANKS

These can be installed to use 1.6 or 1.0 gallons per flush. These products can save 20-45% more water than your typical tank and bowl configurations. The stronger flushing action reduces double flushing, and cleans better than gravity style units.

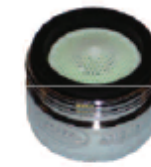

### WATER SAVING IN THE TANK

Items such as Fluidmaster's "Leak Sentry" ballcock shuts off when most tanks continue to run on, wasting water. This along with water saving flappers, and other products, make saving water simple.

### WATERLESS URINALS

By installing waterless urinals, especially in high usage areas, you can save up to 45,000 gallons a year, per urinal! And since there is no need to run water supply pipes, the installation is less costly. Retrofit costs are easily recovered in the water reduction savings.

### AERATORS

Slotted, laminar flow, vandal resistant and regular... all with water saving features. We have aerators for your faucets that offer 2.5 gpm (gallons per minute), 2.2 gpm, 1.0 gpm, and 0.5 gpm. \*lower gpm available as special order

### SHOWER HEADS

Commercial or residential style, we provide shower heads with water reduction ranging from 2.5 to 1.0 gpm. These gpm ratings mean thousands of gallons of water saved from earlier conventional model shower heads.

### SOLAR POWERED & ELECTRONIC FAUCETS

Solar power in the restroom? If you're looking to go "green", this is the way to go. Each faucet works with ambient light, like a solar-powered calculator. The faucet with its integrated storage cell, transforms light from any other source into electrical energy. Save energy, save water!
